SECURITY & STORAGE

Keep your pride and joy safe from dust, moisture, and common thieves. Harley-Davidson has engineered a complete line of garage storage accessories, heavy-duty locks, security systems and protective covers to protect and store your investment.
SECURITY & STORAGE

A. CRUISER CRADLE WHEEL CHOCK

This sturdy aluminum wheel chock will hold your bike securely on the ground, on a trailer, or in the back of a pickup truck. Sized to fit most motorcycles, this wheel chock will keep your bike upright while you are storing, transporting or working on your bike. Designed for roll-on roll-off use, the rocking cradle allows one person to easily park their bike in the stand. Just roll the bike into place and dismount. The Cruiser Cradle holds the bike in place without straps. Upright storage saves garage space and permits easy access to both sides of the vehicle.

Cruiser Cradle’s utility is not limited to the garage. The lightweight, folding wheel chock is easy to transport. Use it on the driveway when you are washing your bike, or, when equipped with the optional Trailer Adapter, the versatile wheel chock can be easily moved to a trailer or the back of a pickup truck. The one-person, operation simplifies securing the bike for transport. Load the bike into the Cruiser Cradle, dismount, and the bike remains upright. Just two tie-down straps are required to hold the bike in place. And because you don’t need to overtighten the straps, you won’t damage sensitive suspension parts and handlebar bushings.

When armed, the Security System disables the starter and ignition while monitoring the electrical system and vehicle motion with adjustable sensitivity. Minor disturbances trigger a momentary warning; major ones, an unbroken thirty-second alarm, after which the Security System returns to monitoring. A distinctive four-way flasher pattern is the alarm signal. An optional self-powered Smart Siren Kit adds a piercing scream that sounds even if the battery cable is cut.

The Security System is armed and disarmed with a remote control waterproof key fob utilizing state-of-the-art rolling code technology. If the key fob is not available, the rider may arm or disarm the system by keying a previously entered personal code on the turn signal switches. A flashing status indicator informs the rider that the Security System is armed or disarmed.

When armed in the Transport Mode, the Security System disables the starter and ignition, but monitors only the electrical system, not vehicle motion. The vehicle may be moved but electrical tampering triggers an alarm.

An Extended Storage Mode keeps the battery from discharging when the Security System is armed for extended periods of time.

The Security System is compatible with FL Touring models equipped with approved TLE/Ultra Sidecars when the system is configured as described in the Sidecar owner’s manual.

C. H-D SECURITY SYSTEM SMART SIREN II

Security and convenience in one. The Harley-Davidson® Smart Siren II combines the functionality of the smart siren and pager transmitter into one easy-to-install unit. Featuring a built-in back-up power supply, the siren and transmitter functions will continue to operate even if the wires are cut or the vehicle battery is disconnected. When combined with the Pager Receiver II (sold separately), the integrated FM transmitter can warn of tampering up to 1/2 mile away. Smart Siren II features an enhanced sound chamber, a redesigned internal battery access cover, and ultra low power consumption during the standby mode. When activated, the Security System Fob arm and disarm commands are confirmed with a blink feature and '07-later models can be programmed to emit a chirp. Smart Siren II is certified for use in North America.

A. KEYED-TO-MATCH INDIVIDUAL REPLACEMENT LOCK PROGRAM
In the past, replacing a lock required the time and expense of re-keying a new lock or replacing all of the locks on your bike. Our Keyed-to-Match Program eliminates that hassle and allows you to order an exact replacement based on your lock’s key code, right down to the quality you would expect from a stock Harley-Davidson® lock. Just ask your Dealer to refer to Bulletin Number 658B and they’ll take care of your needs – lock, stock and barrel.

B. REMOTE CONTROL GARAGE DOOR OPENER KIT
Operate your automatic garage door opener without leaving your motorcycle seat or fumbling in your pocket for the remote control. Compatible with most brands of automatic openers, this kit allows you to operate your door by cycling the bike’s high-beam switch. The hidden transmitter splices into your bike’s wiring harness and is powered by your vehicle battery, so there are no transmitter batteries to replace. When your key is switched off the transmitter is disabled, providing added garage security if you park your bike outside. The signal is sent to the in-garage receiver that plugs into a standard 110-volt outlet and is wired to the automatic opener. The receiver’s rolling code technology provides additional security. Kit includes one transmitter and one receiver. Individual components are available to equip additional motorcycles and garages.
