SPLIT THE WIND
At highway speed, you take the wind full-force in the chest, causing fatigue in your arms, neck and shoulders. Take the pressure off with an easy-to-install detachable windshield. Shaped to divert air, rain and road debris around the rider, a windshield can add hours of riding comfort.

LINE OF SIGHT
To avoid looking through bug spots, condensation and road grime, select a windshield that tops out just below your line of sight.

WINDSHIELD OPTIONS

WIND SPLITTER
Wind Splitter Windshields are shaped for effective airflow management and “wow” styling. The sweeping design adds height over a traditional low-profile wind deflector in the center where it counts.

VENTILATOR WINDSHIELD
Ventilator Windshields feature side-mounted vents that allow you to adjust the airflow to match the riding conditions. Opening the vents redirects the air across your chest for a cooling effect, and closing the vents provides maximum wind and weather protection.

DETACHABLE MOUNTS
Designed to be installed or removed without tools in seconds, a detachable windshield gives you the freedom to define your ride at the drop of a hat. Ride across the country protected from the elements, then quickly remove the windshield to hit the streets in style.

TEMPERATURE CONTROL
Extend your riding season. Full coverage Soft Lowers provide wind and mud protection for the rider’s legs and boots, and minimize cold updrafts as the weather changes. Covers simply clip in place for speedy installation, and can be easily removed as temperatures rise.

A. WIND SPLITTER VENTED WINDSHIELD
Reduce helmet buffeting at speed. The Harley-Davidson® Wind Splitter Vented Windshield features an exclusive fingertip-adjustable center vent that reduces turbulence behind the windsreen. When open, the controlled airflow fills the negative pressure area behind the shield, and helps to smooth the flow of air over the top of the screen and around the rider. The revised flow reduces helmet bobbing and neck fatigue so you can comfortably spend more time in the saddle. The open vent also provides cooling airflow to the rider at low speeds and in city traffic.

Engineered to provide the riding comfort of a larger windshield, this low-profile screen’s contemporary contour sets it apart from the crowd. The shape keeps the windshield below your site line so you don’t look through bugs and road grime, and the detachable design means you can ride without the shield when the mood strikes. The shield is formed of hard-coated polycarbonate for strength and scratch resistance, and the dark-smoked finish reduces glare. The slim polished stainless steel brackets mount to the Original Equipment rubber isolated docking points for ease of installation and removal.

57400176  $424.95
Fits ’94-later Road King® models. (Does not fit with Mini Tach or Boom!™ Audio Cruiser Speakers.)

Wind Splitter Windshields

A. WIND SPLITTER WINDSHIELD – ELECTRA GLIDE®
In the world of functional performance, size does matter. After all, it’s simple to understand that the larger the wind-shield area, the greater the amount of wind deflection. The Wind Splitter Windshield is a great look for all Touring models and is shaped for the perfect combination of effective airflow management and “wow” styling. The sweeping design complements the shape of the fairing and the inner dash panel, and adds height over a traditional low-profile wind deflector in the center where it counts. The shape decreases wind noise, and improves your ability to hear the motorcycle’s sound system. The rich smoked finish does not interfere with your forward view, and looks great against any paint color. The easy-to-install Wind Splitter features a center-mount Bar & Shield medallion for a distinctive finishing touch.

Fits ’96-later Electra Glide®, Street Glide® and Trike models. Does not fit with zümo® 550 GPS Navigator, windshield bags or pouches.

A. VENTILATOR KING-SIZE DETACHABLE WINDSHIELD

In a nutshell, a windshield should provide a barrier between the rider and errant bugs, discarded cigarette butts, flying debris and bad air. The shield should manage airflow and wind blasts to create a pocket of still air for both rider and passenger comfort. But if you ride in a warm climate, or spend time at low speeds stuck in traffic, you need to keep some air circulating around your body to stay comfortable. The Ventilator Windshield features clear injection-molded vents that allow you to adjust the airflow to match the riding conditions. Opening the vents redirects the air across your chest for a cooling effect, and closing the vents provides maximum wind and weather protection. But when you want to ride “naked,” the Detachable shield can be removed completely and reinstalled in seconds to match your riding mood.

SEAT OF POWER

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls, and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you — and your passenger.

TALLBOY® SEAT

SUPER REDUCED REACH® SEAT

LAP OF LUXURY

If your passenger is happy, you’ll be happy. Premium passenger armrests have been ergonomically designed to provide the ultimate in passenger comfort. The soft pads provide excellent forearm support on a long ride, and eliminate the passenger’s “what do I do with my hands” dilemma.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks, and swap it out for a low-profile seat for a night on the town. Please see your owner’s manual for proper removal and installation of seats.

TOURING SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

TOURING SEATS

SUSPENSION SEATS

Harley® Hammock and Road Zeppelin® seats provide isolation from road shock with internal fabric or air bladder suspension systems that prevent “bottoming out” to increase rider comfort and endurance.

TALLBOY® SEATS
The correct riding position can help a tall rider sit comfortably on the bike, and avoid leg cramps and back strain during a long day in the saddle. For riders with a longer inseam, a Tallboy® Seat will put you on the road to fatigue-free riding. Designed to move the rider up and back from the stock seating position, a Tallboy Seat can eliminate the “knees-high” riding position, and effectively places the body for a natural arm and leg reach to the controls. Tallboy Seats feature a bucket-shaped design for added support, and a wide seating surface to reduce pressure on the tailbone.

E. TALLBOY SEAT – ‘08-LATER MODELS
This Tallboy Seat moves the rider back 2” to provide much-needed arm and leg room for the long-limbed rider. The seat height is similar to stock, and the slight bucket shape offers additional lower back support. Passenger comfort will be maximized with the Tour-Pak® Luggage mounted in the rearmost position. Accepts rider backrest (except Adjustable Style) for additional touring comfort.

ROAD ZEPPELIN® AIR ADJUSTABLE SEATS

The open road. That’s where we developed and tested the revolutionary comfort of the Road Zeppelin® Seat. This remarkable seat removes pressure points and “hot spots” by adjusting the amount of air contained in each bladder within the seat. Easy-to-reach rocker switches on the side of the seat control the built-in compressor, adding and bleeding off air with the quick push of a button to help relieve stress from the lower back, tailbone or lower extremities. On a long run, occasionally inflating and deflating the air bladders reduces the “numb butt” effect by improving the blood flow to the extremities. So grab a seat. And enjoy the ride.

A. ROAD ZEPPELIN AIR ADJUSTABLE SEAT – ‘08-LATER MODELS

This Road Zeppelin Seat features two adjustment zones for the rider and one for the passenger, and an internal air compressor that adjusts the air level nearly twice as fast as the previous version. The ergonomically-friendly seat design features a narrow front nose for ease of touching the ground at a stop, with a wide seating surface for long range rider and passenger comfort. This seat is a great addition to Trike models too. The easy-to-clean vinyl seat is finished with an embroidered Road Zeppelin logo that lets everyone see that you take riding comfort seriously. This easy-to-install seat accepts a rider backrest and passenger grab rail for additional touring comfort.

The easy-to-reach integrated hand pump and air release valve permits quick and convenient adjustment. A fine, aged patina and character wrinkles are a sign of the extremely high quality materials used to construct your seat or backrest. The appearance of scars or marks on the leather are a result of using natural leather panels and should not be thought of as an imperfection. Please use Harley-Davidson Leather Dressing P/N 98261-91V to protect your investment.

COMFORT ON THE GO

Sometimes you need more than your bike to make it a great ride. Tour-Pak® luggage holds plenty of rain gear, extra clothing, and basic supplies, while a detachable backrest means a passenger can take on the road with you.

THE RIGHT COMBINATION

PUTTING IT TOGETHER

A detachable sissy bar upright and backrest pad is the starting point for a complete touring machine. Start by shopping the following pages and selecting all the components required for your particular model.

LOAD IT UP

Rain gear, extra clothing and basic supplies are easy to take along when you add luggage to your bike. Designed for maximum versatility, this complete collection of sissy bar- and luggage rack-mounted soft touring luggage ensures you will pack what you need for your next trip.

Designed by riders, for riders, the Premium Luggage Collection is formed of superior heavy-weight ballistic nylon to maintain their shape and protect your belongings over the long haul. And the secure spandex mounting system slips over the passenger backrest for a snug fit.

EQUIPPED FOR THE MILES AHEAD

Solo and stripped down, two-up and fully loaded, or anywhere in between, you can tailor any Harley-Davidson® motorcycle to meet the demands of the highway.

TWO-UP

Take a day’s ride on a bike built for two. Saddlebags carry clothes and the essentials, while a Sissy Bar Backrest Pad provides hours of passenger comfort on the open road.

TWO-UP TOUR-PAK®

The ultimate road trip. With all this space and comfort, you and one lucky passenger are fully equipped to go wherever you want, for as long as you want. See you later.

SOLO TOUR-PAK®

Ride like you’re on a mission. The saddlebags and Tour-Pak offer tons of storage space, and the Solo Mounting Rack positions the Tour-Pak Pad for maximum rider back support.

CHANGING YOUR BACKREST

NOTE: It is possible to overload your motorcycle’s charging system by adding too many electrical accessories. If your combined electrical accessories operating at any one time consume more electrical current than your vehicle’s charging system can produce, the electrical consumption can discharge the battery and cause vehicle electrical system damage. Ask your dealer for advice about the amount of current consumed by additional electrical accessories.

NEVER IN A TIGHT SPOT

On the road, you’ve got to feel good in the saddle. Whether you’re cruising around town or out for the long haul, your bike should welcome you like an old friend and feel like an extension of yourself. So, once you’ve picked the bike, it’s time to choose the suspension that best equips your ride to your personal dimensions.

A STRONG FOUNDATION

Being sure-footed at a stop or when parking your bike enhances your feelings of control and confidence. Adjusting the ride height by lowering the suspension may be the first step in fitting the bike to your inseam length. Combining a low-profile suspension and a narrow seat is the easiest way for a shorter rider to fit comfortably on a larger bike.

A. PREMIUM RIDE DOUBLE CARTRIDGE FORK KIT*
This Double Cartridge Fork Kit converts the standard Original Equipment front suspension into a high-performance suspension with superior ride quality. The Double Cartridge Fork Kit complements the Premium Ride Hand-Adjustable Rear Shocks (Low Profile and Standard-Height) by providing a balanced suspension system capable of delivering superior ride characteristics. The front fork kit improves resistance to front brake dive, improves cornering and enhances bottoming control. Kit includes fork pipes, cartridges, fork bolts, main springs and oil seals.

45500106 $429.95
Fits ’09-later Touring models (except Trike).

B. PREMIUM RIDE HAND-ADJUSTABLE TOURING SHOCKS*
Experience the ultimate in superior ride quality with these Premium Touring Shocks. These shocks utilize a single tube, nitrogen charged emulsion design. The design offers enhanced compression and rebound damping compared to the Original Equipment-style air adjustable shocks. This provides a controlled yet plush ride with much less bottoming. The compression and rebound damping is split between the two shocks—compression on the right and rebound on the left. This design balances the load of each shock: stiff spring with rebound damping on the left and soft spring with compression damping on the right. Larger chambers (40mm diameter pistons and 14mm rods) allow these shocks to react more quickly to impacts. This keeps the tires tracking while minimizing harshness transmitted through the frame. A simple knob behind the left saddlebag allows the rider to conveniently modify the spring preload via a hydraulic adjuster. Available in Standard Ride Height and Low Ride Height versions.

54680-10 Low Profile. $499.95
Fits ’09-later Touring models (except Trike). Does not lower ’09-later FLHX, FLTRX and FLTRSE3 models. Stock on FLHRSSE5, FLHXSE2/3 and FLTRXSE2/2 models.

54000008 Standard-Height. $499.95
Fits ’09-later Touring models (except Trike and models equipped with Front Lowering Kits).

*WARNING: The Profile Low Front Spring Kit cannot be used independently and must be used with the appropriate Profile Rear Shock Lowering Kit. Installation of any accessory suspension components may affect cornering clearance and jiffy stand operation. This could distract the rider, causing loss of control and death or serious injury.

54630-03A $49.95
For use with Touring air suspension components.

G. DIGITAL TOURING SUSPENSION AIR PUMP
Adjust air pressure in your Touring shocks anywhere on the road. This easy-to-adjust Digital Air Pump has a digital display for checking and altering pressure in the rear air shocks on all Touring motorcycles. Gauge can also be used to measure air pressure in your tires. Features “Micro bleed” valve that allows precise adjustment of air pressure, and the “no loss” air connector maintains shock pressure when the fitting is removed. Display units can easily be changed between PSI and KPa. The LCD readout operates on a long-lasting, replaceable lithium coin-type battery (CR2032 3V, P/N 66373-06).
