BOOM! AUDIO TANK POUCH

GENERAL

Kit Number

91003-10

Models

This kit will work on all Harley-Davidson® motorcycles with a metal fuel tank.

NOTES

Some local governments prohibit or restrict the use of headset (helmet-mounted) speakers and headphones. Check with local authorities and obey all applicable laws and regulations.

Pouch magnets can damage magnetically stored information. Do not use the tank pouch with storage devices that use magnetic media, such as hard drive type media players.

Kit Contents

This kit contains one Audio Tank Pouch and cushion.

OPERATION

NOTE

Always clean fuel tank before using the Audio Tank Pouch, to prevent trapped dirt from scuffing or scratching paint. Scuffing and fine scratches can be removed using Harley-Davidson® Swirl & Scratch Treatment.

- See Figure 1. Flip access flap (3) fully to the front as shown to put media player into the pouch (1).
- Remove the cushion from the inside of the pouch. Place the media player face-up on top of the cushion and slide both back into the pouch. Make sure the cushion is under the media player for the best protection.
- See Figure 2. Two access holes (2) are available for connecting headphone or speaker connectors (3).
- Place the media player and pouch (1) on top of the fuel tank and verify that the magnets are holding the pouch firmly in place.
