

# THE BRASS COLLECTION

## PRODUCT CARE INSTRUCTIONS

---

Each Brass Collection part is pre-aged to a rich patina. As brass is a living metal, the finish of each part will continue to evolve, developing its own unique appearance as it is handled and exposed to the environment. Parts will age and their patinas will change at different rates based on their location on your motorcycle. Variance in patina from each carefully hand-crafted part, along with the natural attributes of brass, will make your bike a true custom.

The photos above illustrate the natural color variance between Brass Collection parts when new.

### CLEANING INSTRUCTIONS

1. Ensure part is dry and free of dirt or debris.
2. Place a small amount of Harley-Davidson® Chrome Clean & Shine on a microfiber cloth or detailing swab.
3. Using light pressure, rub the brass parts with the microfiber cloth. For hard to reach places or grooves, use the detailing swab.

### OBTAINING A BRIGHT FINISH

Brass parts will naturally age and darken with time. If a bright brass finish is preferred, place some Harley-Davidson Bare Metal Polish on a microfiber cloth and lightly rub on the brass parts until they reach the desired brightness.

### SLOWING THE NATURAL AGING PROCESS

To slow the aging process of the brass parts, place a small amount of Harley-Davidson Glaze Poly Sealant on a microfiber cloth or detailing swab, and lightly rub on the parts until the sealant has soaked in.
